Introduction

This is the second special issue for the Second Conference on “Logic and the Theory of Games and Decisions” (LOFT2), which took place at the International Centre for Economics Research (ICER) in Turin in December 1996. The first issue appeared in this journal, volume 36 (1998), No.1. The history and background of the Loft conferences can be found in the introduction to the first issue.

This issue has a greater variety of papers: expected and nonexpected utility theories, probabilistic considerations of beliefs and knowledge, model-theoretic considerations of knowledge and communication, and epistemic logic approaches to Nash equilibrium. These reflect possible approaches to foundational issues in logic, games and decisions, which were intensively discussed in the Loft2 conference.

The three guest editors would like, again, to express their gratitude to Hervé Moulin, Editor-in-Chief of Mathematical Social Sciences, for devoting two special issues of the Journal to LOFT2 and to ICER for funding and hosting LOFT2. The guest editors would also like to thank the referees for their invaluable help and the authors for their cooperation.

Mamoru Kaneko, University of Tsukuba

Giacomo Bonanno, University of California – Davis

Philippe Mongin, Centre National de la Recherche Scientifique, Université Cergy–Pontoise

2. **Epistemic considerations of decision making in games**
Pages 105-137
Mamoru Kaneko
[SummaryPlus](#) | [Full Text + Links](#) | [PDF \(185 K\)](#)

3. **Non-Archimedean subjective probabilities in decision theory and games**
Pages 139-156
Peter J. Hammond
[SummaryPlus](#) | [Full Text + Links](#) | [PDF \(126 K\)](#)

4. **Hierarchies of knowledge: an unbounded stairway**
Pages 157-170
Aviad Heifetz and Dov Samet
[SummaryPlus](#) | [Full Text + Links](#) | [PDF \(100 K\)](#)

5. **A modal logic of intentional communication**
Pages 171-196
Marco Colombetti
[Abstract](#) | [PDF \(140 K\)](#)

6. **Capacities and probabilistic beliefs: a precarious coexistence**
Pages 197-213
Klaus Nehring
[SummaryPlus](#) | [Full Text + Links](#) | [PDF \(110 K\)](#)

7. **Group knowledge is not always distributed (neither is it always implicit)**
Pages 215-240
Wiebe van der Hoek, Bernd van Linder and John-Jules Meyer
