

ON ORIG.

52

Hooverville, Sacramento, Calif.
One of Hooverville's better residences.

Overview of the History of California Agriculture

- Wheat Production of the 1850's-1900
- The Great Transition, 1890-1914
- Rise of Cotton

The Californian Model

- Domar Model
- Myth of Midwestern Farms
- California's "Exceptionalism"

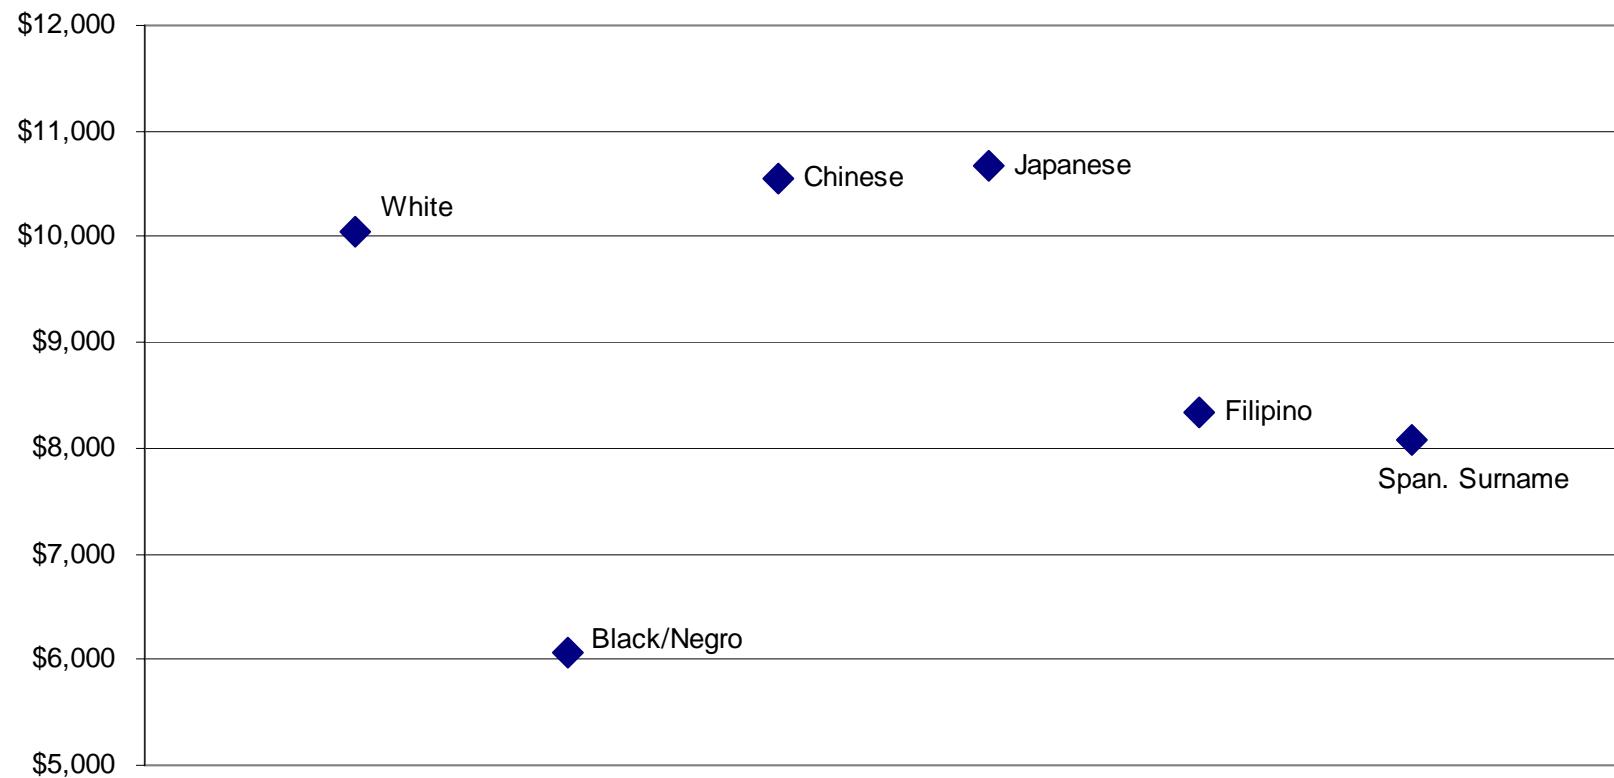

Contract Labor

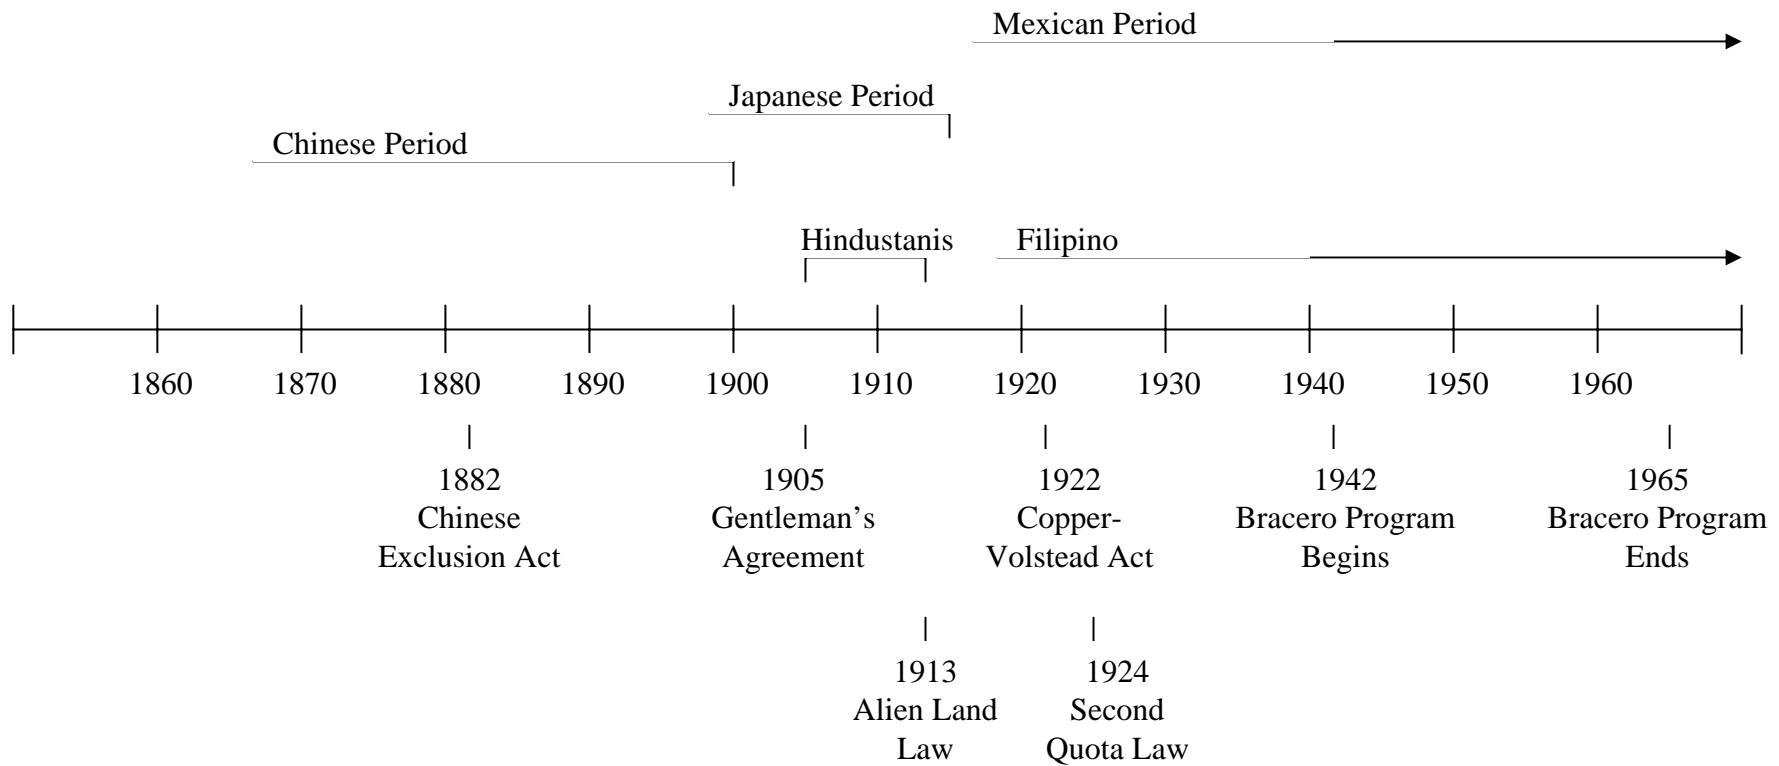

- Chinese Period
- Japanese Period
- Mexican Period
- Filipino Labor
- Hindustanis Labor

The Economic Ladder v.s. The Agricultural Ladder

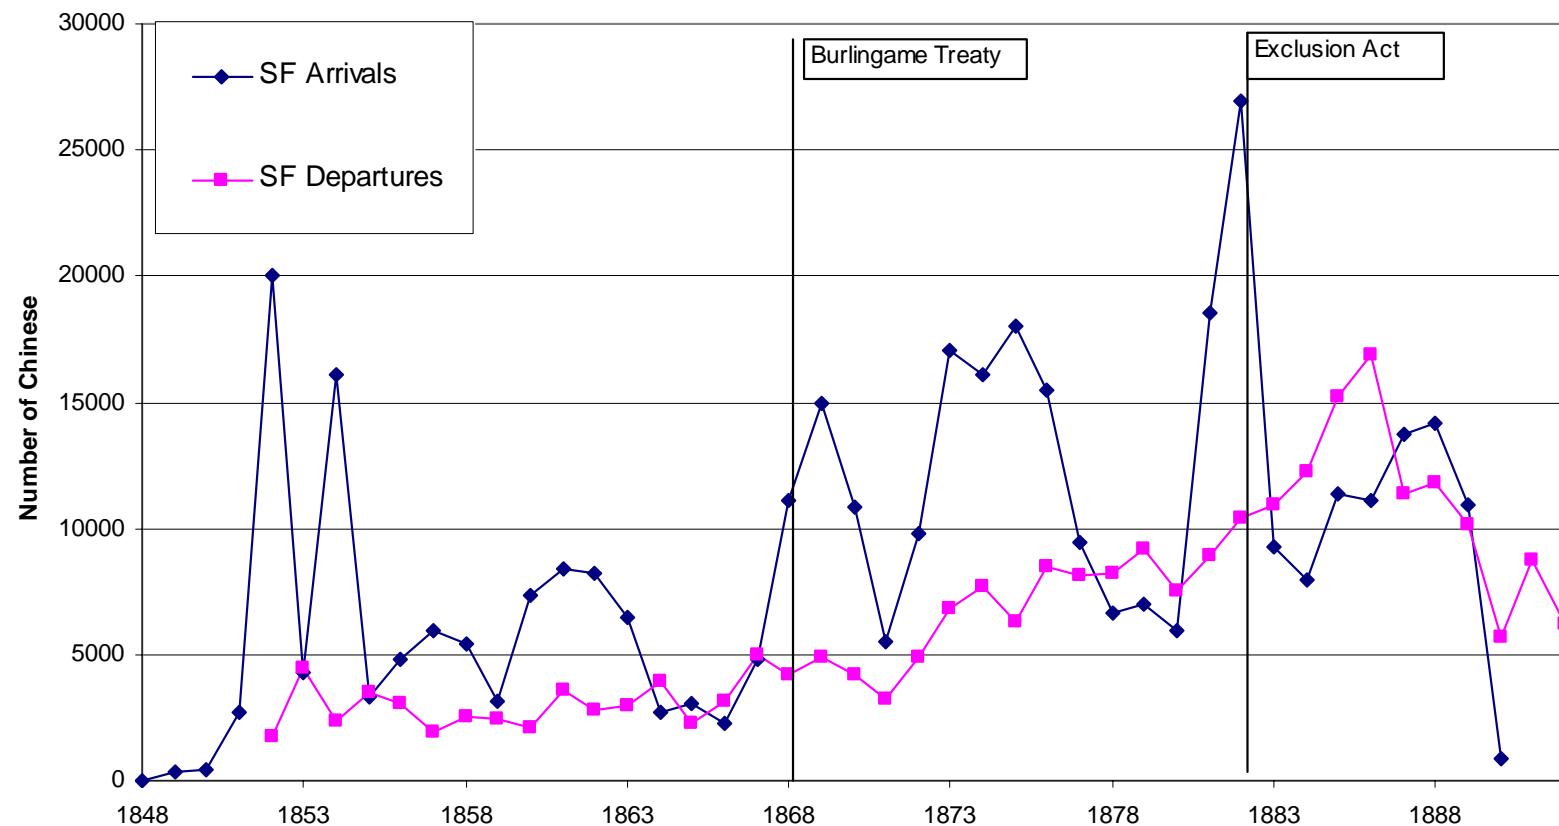

- The Agricultural Ladder of the Midwestern Farm Model

Mean of Personal Income of Males 25-44 Born in California, 1970

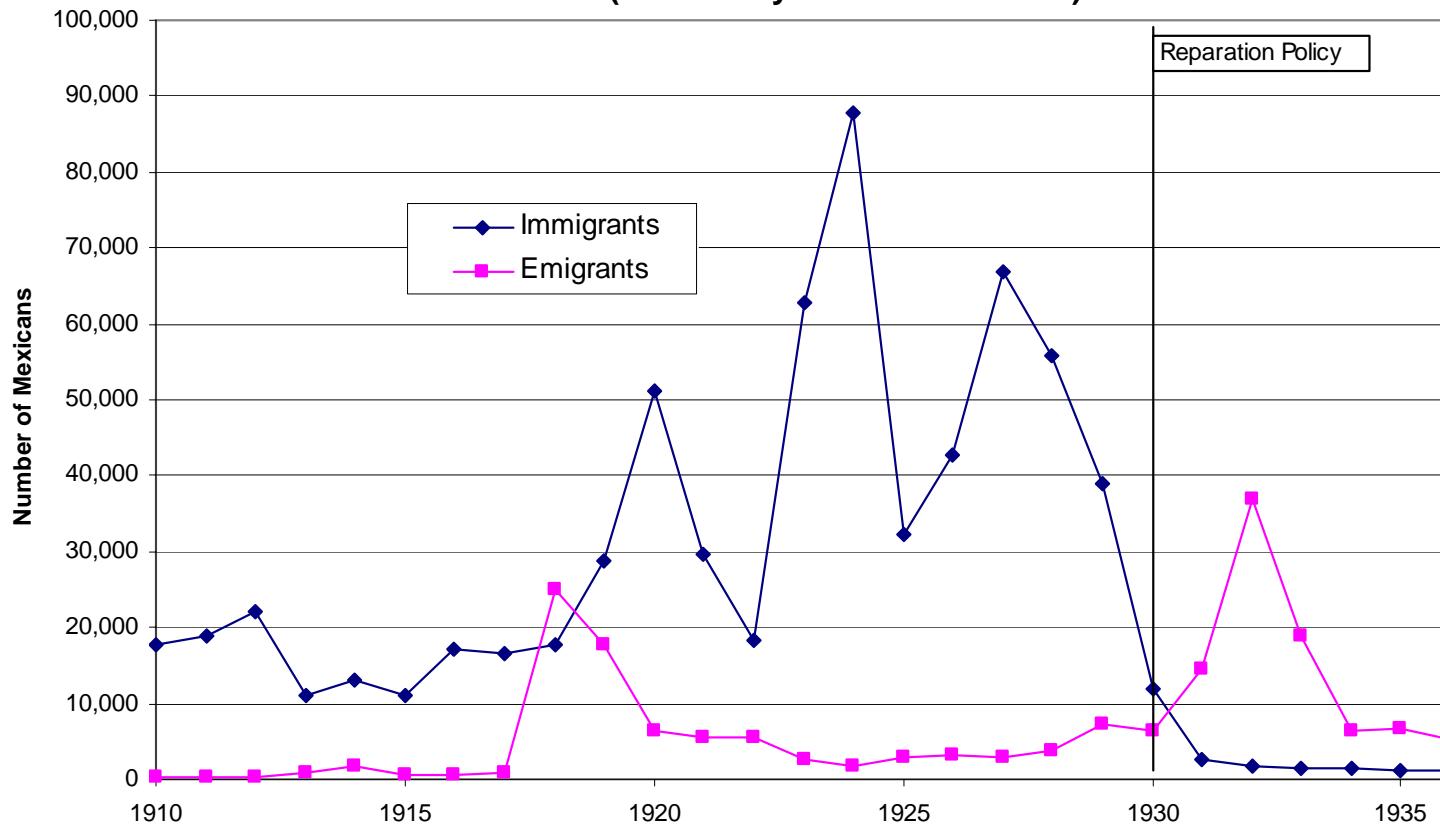

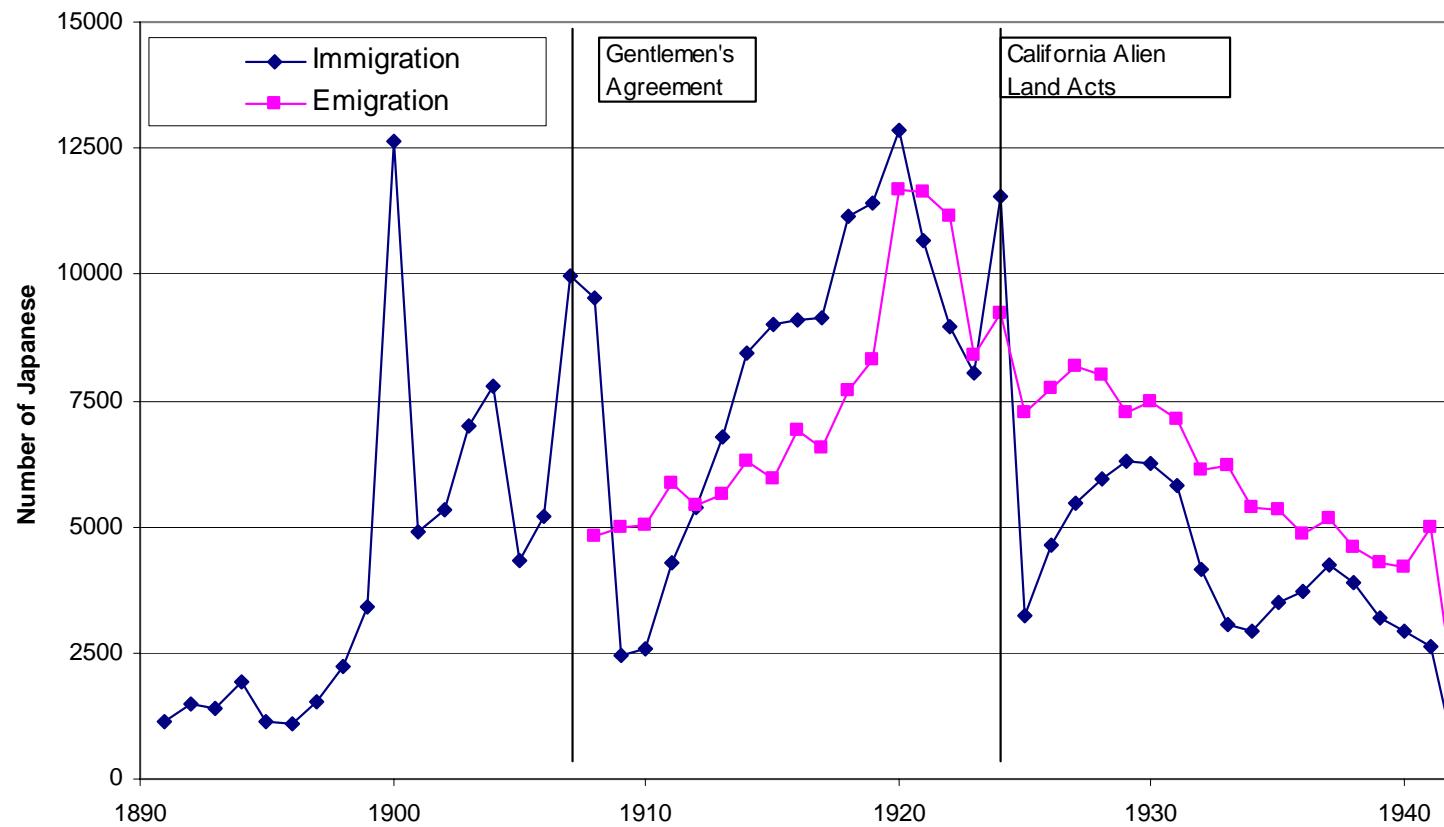

Chinese Arrivals and Departures at Port of San Francisco

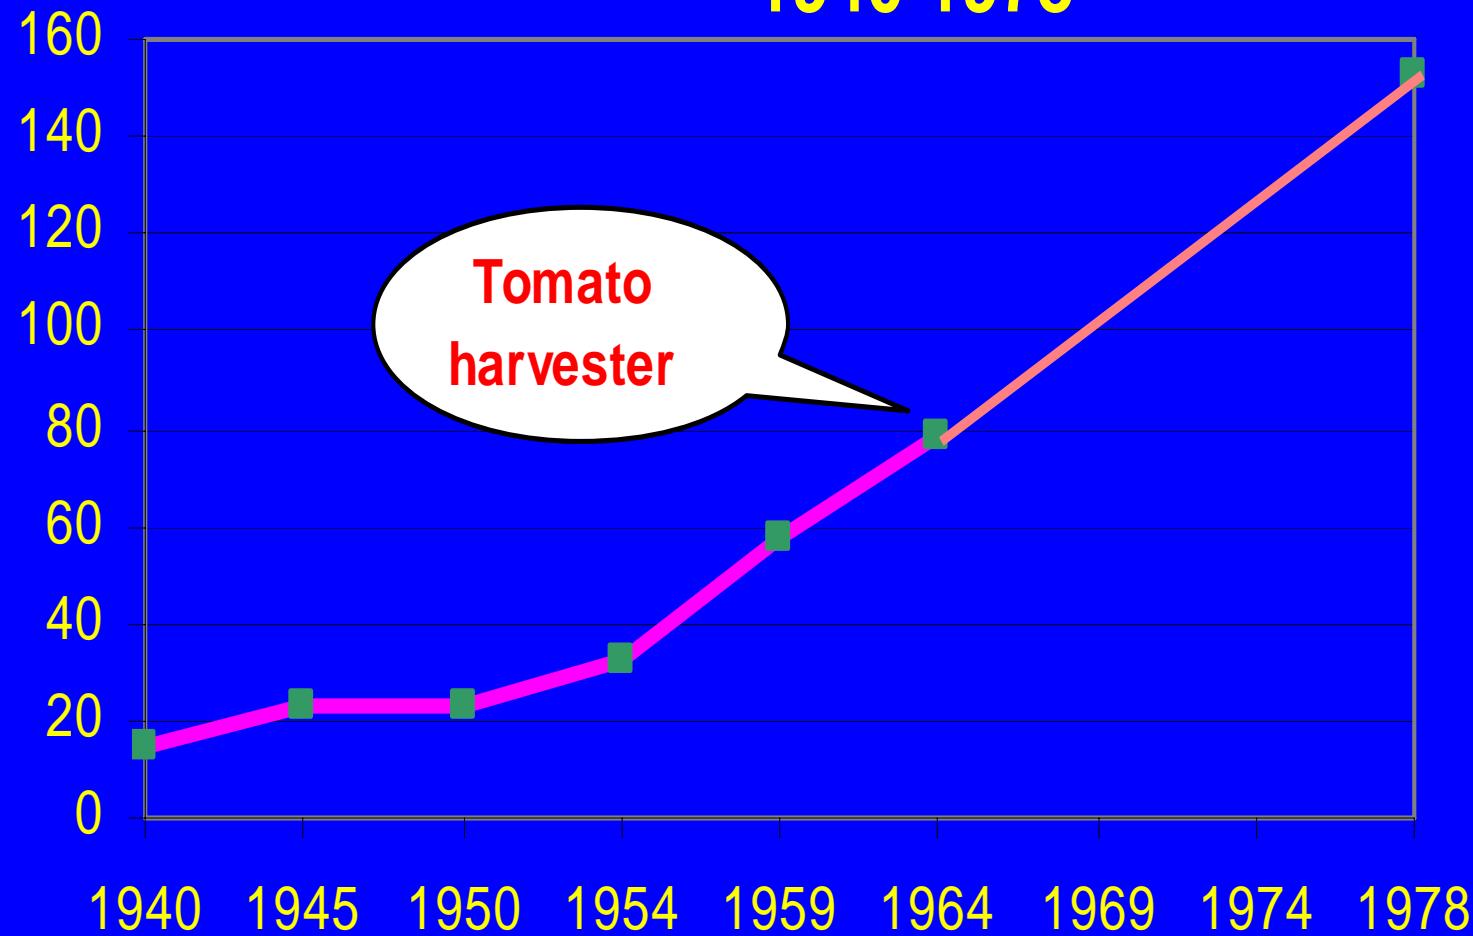

Mexican Legal Migration Flow to United States (n.b. chiefly outside California)

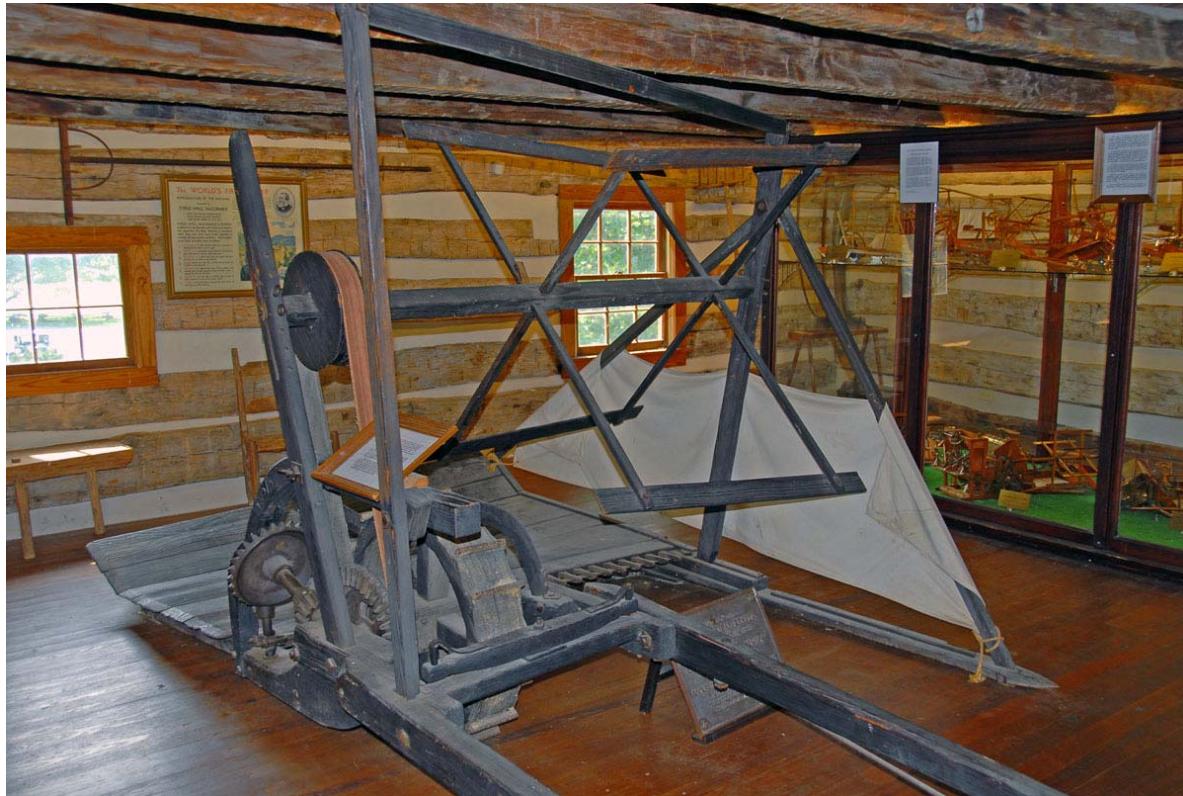

Japanese Migration Flows to the Continental United States

California Tomato Industry: Average Acreage 1940-1978

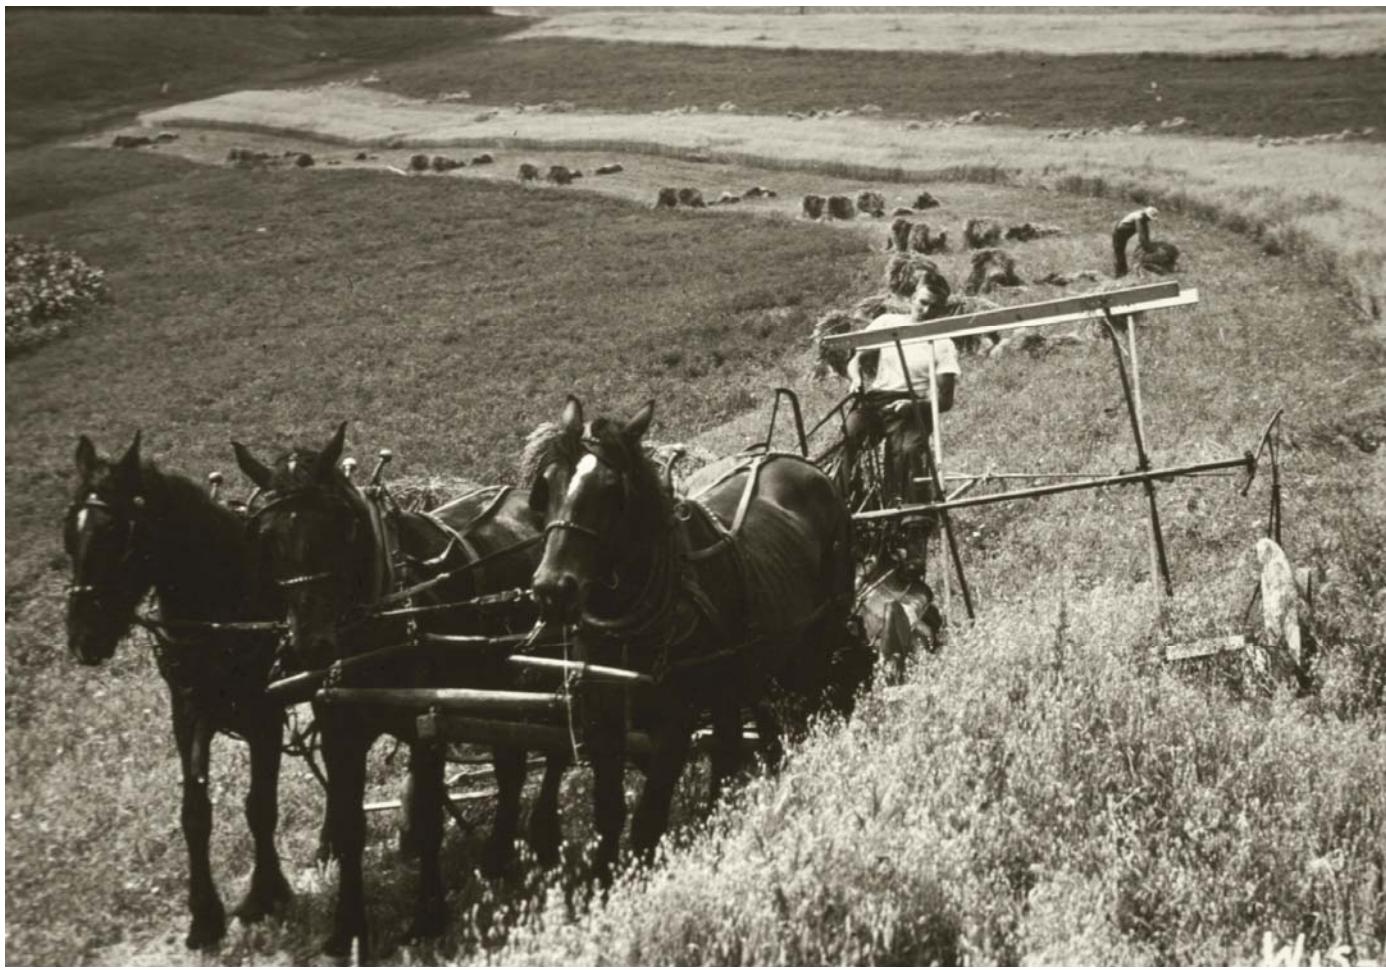

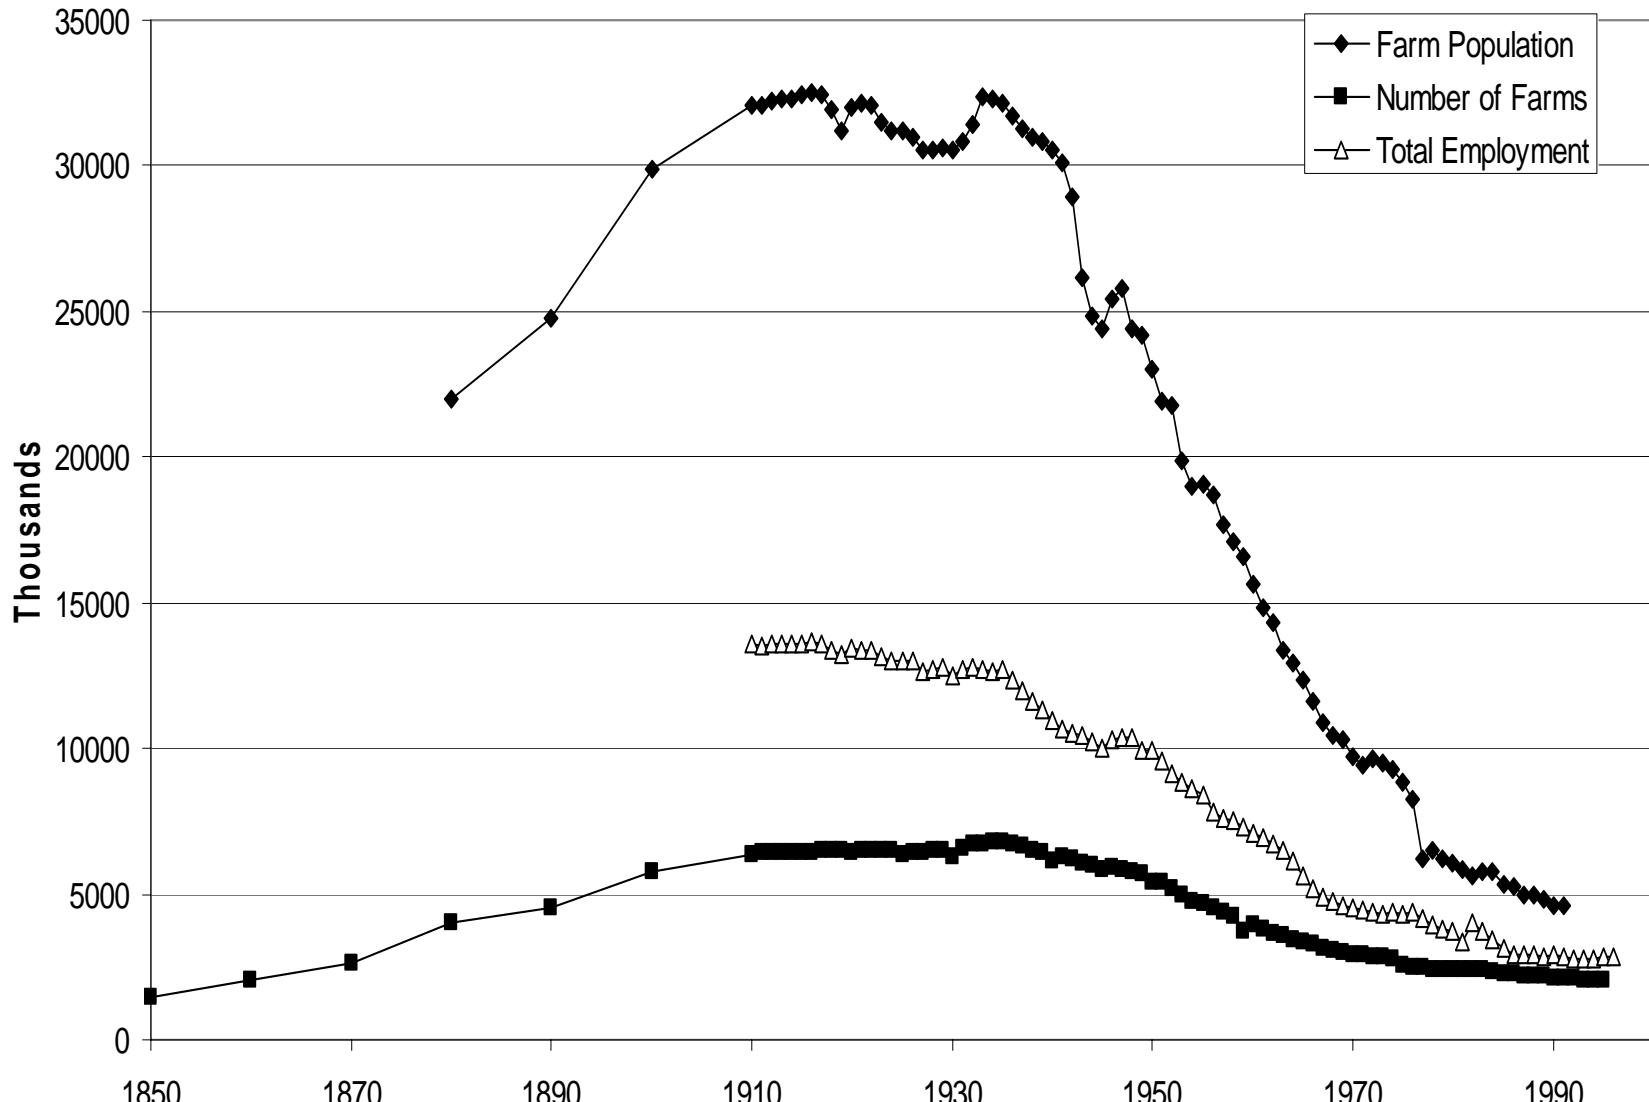

TABLE 4

Agricultural Employment in American South

	<u>Number Employed (in 1000s)</u>			<u>Percentage Decline</u>		
	<u>1950</u>	<u>1960</u>	<u>1970</u>	<u>1950-60</u>	<u>1960-70</u>	<u>1950-70</u>
Family Workers	4104	2192	1340	47	39	67
Hired Workers	1219	902	535	26	41	56
Total	5328	3094	1875	42	39	65

Thinking about Technological Change

- Counterfactual Worlds
- Threshold Models
 - fixed vs. variable costs
- Induced Innovation

Stylized Past

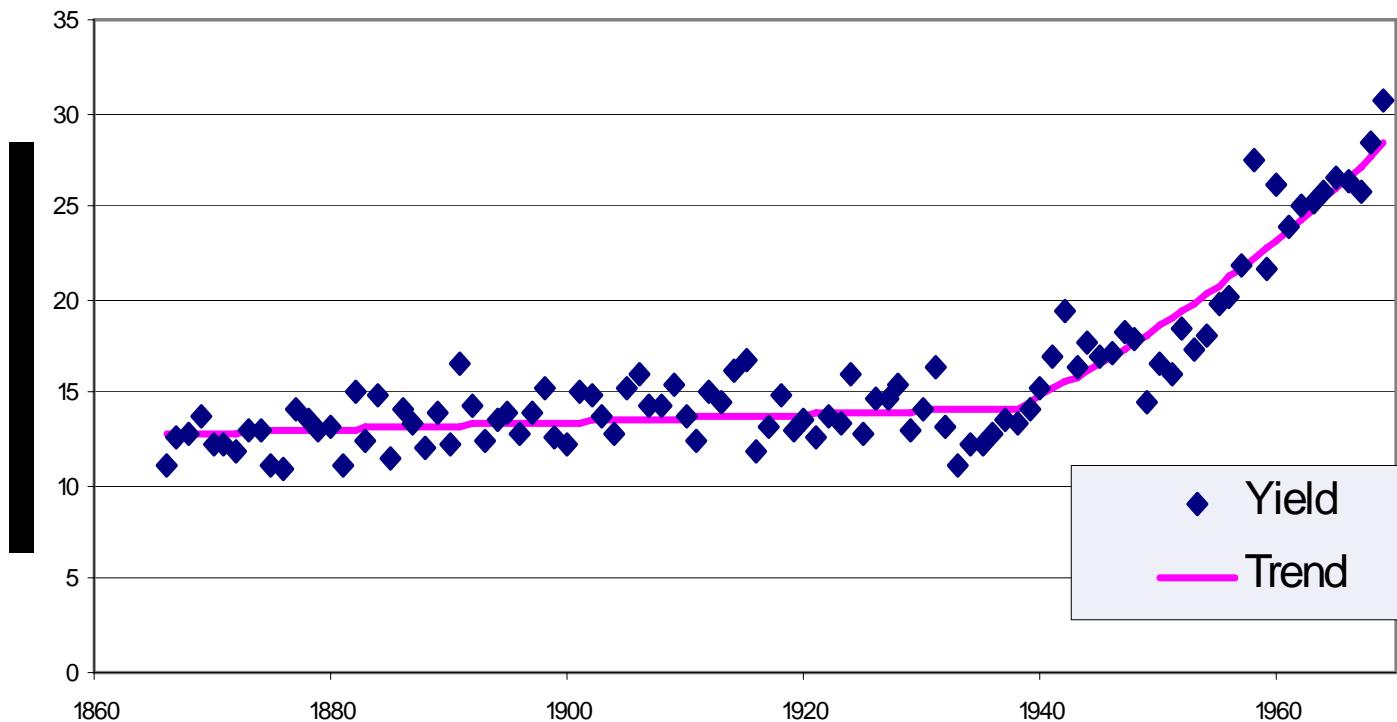

Pre-1940

Age of Mechanical Innovation

Post-1940

Age of Biological Change

US Wheat Yields

Durum Wheat Yields

<u>Year</u>	Yield per Acre (Bushels)
1942-1951	14.5
1952	9.7
1953	6.2
1954	3.0
1958	23.8

Threshold Model
